

Physics 275 Syllabus - Spring 2019

Dr. Anwar A Bhatti

Official Course Description: PHYS275 - Experimental Physics I: Mechanics and Heat

(2 credits) (PermReq) Grade Method: REG/P-F/AUD. Prerequisite: PHYS161 or PHYS171; and PHYS174. Additional information: CORE Physical Science Lab (PL) Course only when taken concurrently with PHYS272. Methods and rationale of experimental physics. Intended for physics majors and science and engineering students who desire a more rigorous approach. Experiments chosen from the areas of mechanics (from PHYS171), gas laws, and heats. Theory and applications of error analysis.

What the course is about: Physics 275 is the second course in the introductory Physics lab sequence PHYS 174-275-276. The course is intended for physics majors and also for science and engineering students who desire a more rigorous introduction to experimental science. Experiments are mainly chosen in the general area of mechanics. A major component of the course concerns understanding error analysis, both learning how to do it and appreciating what a useful tool it is. The Lab meets for four hours each week in **Room 3104** of the John Toll Physics Building. You should expect that roughly three hours of this time will be spent working on the lab and one hour in discussion with your instructors and other students during the lab. To get the latest information on Physics 275, check ELMS Canvas or:

<https://umdphysics.umd.edu/academics/courses/962-physics-275-experimental-physics-i.html>

* **Prerequisites:** The prerequisites for the course are Physics 174 and Physics 171 (or Physics161).

* **Co-requisites:** You must also be enrolled in Physics 272 in the same semester in order to get CORE lab science credit.

Lab sections: All classes meet in Room 3104 in the John Toll Physics Building

	Day	Time	Instructor	Teaching Assistant
0201	Monday	2-5:50 PM	Fred Wellstood	Clayton Ristow
0301	Tuesday	2-5:50 PM	Hassan Jawahery	Joseph Mariano
0101	Wednesday	2-5:50 PM	Fred Wellstood	Clayton Ristow
0401	Thursday	2-5:50 PM	Hassan Jawahery	Joseph Mariano
0601	Monday/Wednesday	11:00 AM - 12:50 PM	Anwar Bhatti	Ian Florang

* Teaching Assistants

	e-mail	office	phone
Clayton Ristow	cristow@terpmail.umd.edu	3101 Toll Phys. Bldg.	- x5 6191
Joseph Mariano	jmariano@terpmail.umd.edu	0220 Toll Phys. Bldg.	- x5 5969
Ian Florang	iflorang@terpmail.umd.edu	TBA	TBA

weightings. Standard grading will be followed (A is 90-100, B is 80-90, *etc.*) unless the class's distribution of scores is unusual, in which case a standard curve will be used.

* **Your Lab Report** - Each week, before you leave the lab, you must submit to ELMS Canvas an Excel spreadsheet lab report of all the work you completed so far. If you need to make revisions to this report, or finish some parts, you must submit a revised report before the start of your next lab session.

* **Homework** is assigned on **Expert TA**. Typically there is a homework assignment at the end of each Lab and it is due before the start of your next lab session. To get credit for completing the homework, you must log into your own area in Expert TA and submit your answers via **Expert TA** before the deadline.

* **No credit will be given for late homework unless you are seriously ill and provide a written note from your physician.**

* The University of Maryland, College Park has a nationally recognized Code of Academic Integrity, administered by the Student Honor Council. This Code sets standards for academic integrity at Maryland for all undergraduate and graduate students. As a student, you are responsible for upholding these standards for this course. It is very important for you to be aware of the consequences of cheating, fabrication, facilitation, and plagiarism. For more information on the Code of Academic Integrity or the Student Honor Council, please visit:

<http://www.studenthonorcouncil.umd.edu/whatis.html>.

* **General Comments on the Lab report and Homework:**

Finishing all the lab reports and homework sets is very important. If you can't completely finish a lab and homework set, it is still important to turn in what you do have. When you are working on your report or homework, feel free to discuss with other students to try to figure out what is going on. However, do not use these discussions as an excuse to copy someone else's report or solution, or let someone else copy yours. That is cheating and is strictly forbidden. It is also very self-defeating since a large part of your grade (50%) will come from tests. The right way to proceed is first to work through the report and arrive at a definite answer on your own. With this preparation, you can then discuss intelligently with your colleagues and see if you have missed something essential. Of course, you can always ask one of your instructors.

In some of the homework assignments, you will see that there are problems labeled with an H. These are optional problems which are intended "For Hotshots Only" and do not count towards your grade. If you like thinking about physics problems, and are looking for something a bit more challenging, then go ahead and try them - we made these problems just for you.

* **In case of bad weather:** If the University is open and you have a schedule lab, then the lab will be open and you need to attend. On the other hand, winter in the Washington metro area often brings large snowstorms that make travel difficult and dangerous. The University is usually quite proactive in closing when road conditions are likely to be dangerous or in emergency situations. Closures are announced on the [University's homepage](#) and over local radio and TV. If your lab section is scheduled to meet during a time when the University is closed due to bad weather, that section of the lab will be cancelled. Check with your instructor on when the experiment will be rescheduled - typically this will be the following week or during the week set aside for Lab Make-ups, depending on how many days the University was closed.

* **One final thing**, if you miss something fundamental in a lab or test, you may be assigned extra problems to solve until you master the concept.

Physics 275 - Spring 2019

(Preliminary Schedule - last updated Jan. 22, 2019)

Monday -Jan 28	First day of the Spring semester- labs start!
Jan 28 - Jan 31	Experiment 1 - <i>Introduction and Diagnostic</i>
Feb 4 – Feb 7	Experiment 2 - <i>Dice and Distributions</i>
Feb 11 – Feb 14	Experiment 3 - <i>Statistics of Radioactive Decay</i>
Feb 18 – Feb 21	Experiment 4 - <i>Position, Velocity and Acceleration</i>
Feb 25 – Feb 28	Experiment 5 - <i>Free Fall</i>
Mar 4 - 7	Experiment 6 - <i>First Review (Experiments 1-5)</i>
Mar 11 - 14	Experiment 7 - First Practical Exam
Mar 18 - 21	Week of Spring Break - No Labs
Mar 25 – 28	Make-up Labs
Apr 1 – Apr 4	Experiment 8 - <i>Standing Waves</i>
Apr 8 - Apr 11	Experiment 10 - <i>Driven Harmonic Motion</i>
Apr 15 - Apr 18	Experiment 12 - <i>Measuring g with a Pendulum</i>
Apr 22 - Apr 25	Experiment 13 - <i>Second Review (Experiments 8, 10, 12)</i>
Apr 29 - May 2	Experiment 14 - Second Practical Exam
May 6 - May 9	Make-up Labs
Monday May 13	Last chance to make-up a lab
Tuesday May 14	Last Day of classes for the semester
Wednesday May 15	Reading day
May 16 - May 22	Week of Final Exams: No Labs
Friday, May 24	Commencement
