

# Physics 275 Syllabus - Fall 2020

## Professors Wendell Hill and Fred Wellstood

All sections meet in Room 3104 in the John Toll Physics Building

**Official Course Description: PHYS275 - Experimental Physics I: Mechanics and Heat (2 credits)** (*PermReq*) Grade Method: REG/P-F/AUD. *Prerequisite: PHYS161 or PHYS171. Additional information: CORE Physical Science Lab (PL) Course only when taken concurrently with PHYS272. Methods and rationale of experimental physics. Intended for physics majors and science and engineering students who desire a more rigorous approach. Experiments chosen from the areas of mechanics (from PHYS171), gas laws, and heats. Theory and applications of error analysis.*

**What the course is about:** Physics 275 is the first course in the new lab sequence PHYS 275-276-375-405. The course is intended for physics majors and also for science and engineering students who desire a more rigorous introduction to experimental science. Experiments are mainly chosen in the general area of mechanics. A major component of the course concerns understanding error analysis, both learning how to do it and appreciating what a useful tool it is. The Lab meets for four hours each week in **Room 3104** of the John Toll Physics Building. You should expect that roughly three hours of this time will be spent working on the lab and one hour in discussion with your instructors and other students during the lab. To get the latest information on Physics 275, check ELMS Canvas or:

<https://umdpysics.umd.edu/academics/courses/962-physics-275-experimental-physics-i.html>

\* **Prerequisites:** The prerequisite for the course is Physics 171 (or Physics161).

\* **Co-requisites:** The co-requisite is Physics 272.

**Lab sections:** All sections meet in Room 3104 in the John Toll Physics Building

section	Day	Time	Instructors	Teaching Assistants
<b>0101</b>	<b>Monday</b>	<b>2-5:50 PM</b>	<b>Fred Wellstood</b>	<b>Zachary Metzler</b>
0301	Tuesday	2-5:50 PM	Wendell Hill	Zachary Metzler
<b>0201</b>	<b>Wednesday</b>	<b>2-5:50 PM</b>	<b>Fred Wellstood</b>	<b>Anthony Munson</b>
0401	Thursday	2-5:50 PM	Wendell Hill	Anthony Munson

\* **Office Hours:** You can try stopping by our offices at any time we are not in class, but it is best to contact us by e-mail and make an appointment.

\* **Don't arrive late to class:** Classes at Maryland begin right on the hour. It is important that you arrive on time so that you can get instructions for the lab and have time to finish. If you arrive too late, you may not be allowed into the lab and will have to make it up during another section.

**correct weighting listed above.**

\* **Pre-Lab Assignments** - In addition to Homework Assignments, each lab typically also has a Pre-Lab Assignment. The Pre-Lab Assignment for each experiment is due before your lab section meets to do the lab, while the Homework Assignment for each experiment are typically due the week after your section does the experiment. All Pre-lab assignments must be completed on Expert TA and require you to answer a few questions about the lab. The purpose of the Pre-Labs is to make sure that you have looked through the Lab Manual and understand the key concepts before you try to do an experiment.

\* **Your Lab Report** - Each week, before you leave the lab, you must submit to ELMS Canvas an Excel spreadsheet lab report of all the work you completed so far. If you need to make revisions to this report, or finish some parts, you must submit a revised report before the start of your next lab session.

\* **Homework** is assigned on **Expert TA**. Typically there is a homework assignment at the end of each Lab and it is due before the start of your next lab session. To get credit for completing the homework, you must log into your own area in Expert TA and submit your answers via **Expert TA** before the deadline.

\* **No credit will be given for late homework unless you are seriously ill and provide a written note from your physician.**

\* The University of Maryland, College Park has a nationally recognized Code of Academic Integrity, administered by the Student Honor Council. This Code sets standards for academic integrity at Maryland for all undergraduate and graduate students. As a student, you are responsible for upholding these standards for this course. It is very important for you to be aware of the consequences of cheating, fabrication, facilitation, and plagiarism. For more information on the Code of Academic Integrity or the Student Honor Council, please visit:

<http://www.studenthonorcouncil.umd.edu/whatis.html>.

\* **General Comments on the Lab report and Homework:**

Finishing all the lab reports and homework sets is very important. If you can't completely finish a lab and homework set, it is still important to turn in what you do have. When you are working on your report or homework, feel free to discuss with other students to try to figure out what is going on. However, do not use these discussions as an excuse to copy someone else's report or solution, or let someone else copy yours. That is cheating and is strictly forbidden. It is also very self-defeating since a large part of your grade (50%) will come from tests. The right way to proceed is first to work through the report and arrive at a definite answer on your own. With this preparation, you can then discuss intelligently with your colleagues and see if you have missed something essential. Of course, you can always ask one of your instructors.

In some of the homework assignments, you will see that there are problems labeled with an H. These are optional problems which are intended "For Hotshots Only" and do not count towards your grade. If you like thinking about physics problems, and are looking for something a bit more challenging, then go ahead and try them - we made these problems just for you.

\* **University Closures, Bad Weather, and Health Emergencies:** Due to the ongoing Covid-19 pandemic, the University may experience closure if the state, county, or local campus health authorities deem it necessary to contain an outbreak. If the University is closed due to the pandemic, the class will transition to on-line experiments. The Washington metro area also can have severe weather, including hurricanes in summer and large snowstorms in the winter that can make travel difficult or dangerous. The University will usually close when road conditions are dangerous or for other emergency situations. Closures are announced on the [University's homepage](#) and local radio and TV. If your lab section has been scheduled to meet during a time when the University is closed, then

that section of the lab will be cancelled. Check with your instructor on when the experiment will be rescheduled - typically this will be the following week or during the week set aside for Lab Make-ups.

## **Physics 275 - Fall 2020**

**(Preliminary Schedule - last updated August 14, 2020)**

Monday Aug 31	First day of fall Semester - Labs start meeting on-line!
Aug 31 – Sept 3	<b>On-Line Experiment 1 - <i>Excel and Uncertainty</i> (get Zoom link from ELMS)</b>
Monday Sept 7	<b>Labor Day</b> - no classes
Sept 8 – 10	Make-up Experiment 1 (if you missed it or need more time)
Sept 14 – 17	Experiment 2 - <i>Propagation of Errors and <math>\chi^2</math></i> (In-Person labs begin)
Sept 21 – 24	Experiment 3 – <i>Dice and Distributions</i>
Sept 28 – Oct 1	Experiment 4 - <i>Random Decay</i>
Oct 5 - 8	Experiment 5 - <i>Position, Velocity and Acceleration</i>
Oct 12 - 15	Experiment 6 - <i>First Review (Experiments 1-5)</i>
Oct 19- 22	Experiment 7 - <b><i>First Practical Exam</i></b>
Oct 26 - 29	Experiment 8 - <i>Free Fall</i>
Nov 2 - 5	Experiment 10 - <i>Forced Harmonic Motion</i>
Nov 9 - Nov 12	Experiment 11 - <i>Standing Waves</i>
Nov 16 - Nov 19	Experiment 12 - <i>Measuring g to 0.1%</i>
Nov 23- 24	Make-up Labs (Monday & Tuesday of Thanksgiving week)
Nov 25 - Nov 27	<b>Thanksgiving break</b> (Wednesday-Friday)
Nov 30- Dec 3	Experiment 14 - <i>Second Review (Exp 8, 10, 11, 12)</i>
Dec 7 - 10	Experiment 15 - <b><i>Second Practical Exam</i></b>
Dec 14	<i>Last day of classes</i> (Monday) - No Lab
Dec 15	<i>Reading Day</i> (Tuesday)
Dec 16-22	<i>Final Exams</i>
Dec 21-22	<i>Commencement</i>
